Innovation

“I want a range of
products designed
for real life”

Samsung Electronics Co. Ltd is one of the largest consumer electronics brands in the world, united by a corporate philosophy that states; “We will devote our people and technology to create superior products and services, thereby contributing to a better global society”

Samsung has developed an enviable reputation for developing highly functional, well designed products that enhance people’s lifestyles. And nowhere is this more true than in the home, where Samsung has created a comprehensive range of consumer ‘home appliances’ designed to accentuate the modern home and way of life.

Laundry

Refreshingly clean

In designing its new range of laundry products, Samsung threw away conventional thinking and started with a clean slate in order to deliver innovative products with the ultimate in performance and energy saving. The result is a choice of stylish, multi-function machines that work the way you want – with minimum complexity. Built-in easy care features are designed to cope with bigger wash sizes and ensure minimum ironing, while standard energy and water saving features mean that these machines are also ecologically friendly. Samsung's laundry range is designed to put your mind at ease, delivering outstanding washing performance, superb fabric care and the ultimate in ergonomic design and reliability, wash after wash.

ecobubble
TECHNOLOGY

SAMSUNG

WASHING WITH BUBBLES USES 70% LESS ENERGY WITH NO LOSS IN CLEANING PERFORMANCE*

Samsung's ecobubble™ technology uses a bubble generator to dissolve detergent into the water by injecting air, producing a rich soapy foam cushion in the drum. When ecobubble™ is applied, the detergent is better dissolved into the water, resulting in faster penetration into fabric, meaning less hot water is needed to aid the cleaning process. The Super Eco Wash programme washes at just 15°C, but delivers the same cleaning results as a 40°C wash, using 70% less energy as a result.

*Energy claim made on the basis of a comparison between a Samsung ecobubble™ washing machine using the Super Eco Wash programme at 15°C and a Samsung ecobubble™ washing machine using the Cotton Wash programme at 40°C. All testing was conducted in accordance with the European standard IEC 60456, which sets out methods for measuring the performance of clothes washing machines for household use. Independent third party tests were performed on models WF1124 and WF0804. Internal tests were conducted on certain other models. The independent third party testing was carried out with a 4kg load on (a) a 40°C cotton programme and (b) the Super Eco programme at 15°C, both on Samsung washing machines, models WF1124 and WF0804. The exact energy savings with the Super Eco programme at 15°C will vary slightly depending on the model of Samsung ecobubble™ machine used.

Laundry

Market Leading Innovation

Samsung's relentless passion to develop innovative time saving features means that our laundry products are built with you in mind. They are designed to deliver outstanding washing performance, whilst also making your life easier – helping you to do things 'your way'. An array of customised wash programmes are available to meet all of your daily needs; including baby care, outdoor, delicates, wool and hand wash – providing you with the flexibility to clean all of your families' garments safe in the knowledge that your washing machine is working in the most optimum way possible.

ecobubble™ Technology

Samsung's ecobubble™ washing machines can save up to 70% energy* while still delivering superb cleaning performance, wash after wash. This pioneering technology uses bubbles to optimise the performance of your washing machine, creating a cushion of foam that is generated by a mixture of detergent, water and air before the wash cycle begins. This means that detergent is fully dissolved before cleaning commences, allowing increased efficiency and fantastic wash results, even at low temperatures.

Vibration Reduction Technology™ (VRT™)

Samsung's Vibration Reduction Technology™ (VRT™) is the direct result of substantial research and development and rigorous testing to ensure that daily laundry can be washed quietly and with a minimum amount of noise and vibration. This advanced sensory technology makes specific minute adjustments to enable better handling of unbalanced loads, meaning that lateral vibration of the machine is massively reduced, even at the top of the spin cycle. Not only does this technology offer benefits in terms of quieter washing, it also ensures that less vibration stress is placed on the working parts of the machine, meaning it is much more reliable and less susceptible to wear and tear.

Clever features

Digital Inverter Motor

Samsung's innovative Digital Inverter Motors are brushless and use magnets to drive the rotation of the drum. This ensures that there is much less friction inside the motor, meaning noise and vibration is kept to a minimum, which in turn reduces wear and tear on the working parts of the motor itself.

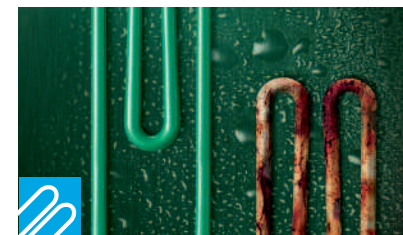

Diamond Drum

The Diamond Drum is unique to Samsung and helps to care for your clothes and fabrics. The holes in the Diamond Drum are 75% smaller than those in a standard drum and are located deep within a diamond-embossed imprint, preventing fabrics from protruding from the drum and consequently becoming damaged.

Big Capacity

The drum capacity of Samsung's ecobubble™ washing machines range from 7kg to 12kg. This means that they are ideal for families where washing large loads is commonplace. Take the hassle out of your laundry routine by saving time and saving energy.

Ceramic Coated Heater

Samsung washing machines use ceramic coated heating elements that are resistant to the build up of limescale deposits, meaning they can last up to 4 times longer than conventional heaters.

Built To Last

The ecobubble™ laundry range is engineered to incredibly high standards, meaning that you can buy a Samsung machine with the peace of mind that it will stand the test of time, wash after wash.

15 Minute Quick Wash

The 15 minute quick wash programme is particularly convenient when you are short of time and need to quickly freshen up your favourite garments.

LCD Colour Display

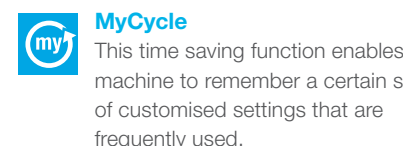

State of the art colour LCD and LED displays make controlling your sophisticated washing machine a simple job.

Award Winning

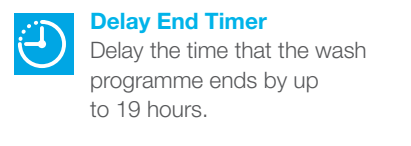

The Samsung ecobubble™ range has received international praise from a variety of trusted environmental and consumer organisations. Our award winning laundry products are kinder to the environment, without compromising on wash performance, design or functionality.

High performance design

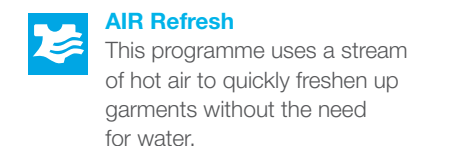

MyCycle

This time saving function enables the machine to remember a certain set of customised settings that are frequently used.

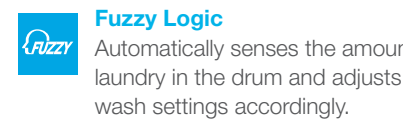

Delay End Timer

Delay the time that the wash programme ends by up to 19 hours.

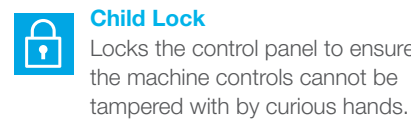

AIR Refresh

This programme uses a stream of hot air to quickly freshen up garments without the need for water.

Fuzzy Logic

Automatically senses the amount of laundry in the drum and adjusts wash settings accordingly.

Child Lock

Locks the control panel to ensure the machine controls cannot be tampered with by curious hands.

Samsung's ecobubble™ VRT™ washing machines feature advanced Vibration Reduction Technology™, using a system of sensors or ball bearings to balance the drum when washing larger load sizes. This means that vibration and noise levels are significantly reduced, even at high spin speeds, meaning your machine is quieter, more durable and more efficient.

ecobubble™ technology not only improves wash performance, it also reduces energy consumption and saves money when washing at lower temperatures. A bubble generator mixes air, water and detergent to form a rich soapy foam that can get cleaning power right to the fibres much faster than in normal washing machines that use a normal mix of water and detergent. These bubbles are able to penetrate fabrics up to forty times faster than a high concentration liquid, meaning wash temperatures can be reduced without compromising on cleaning results.

Clever features

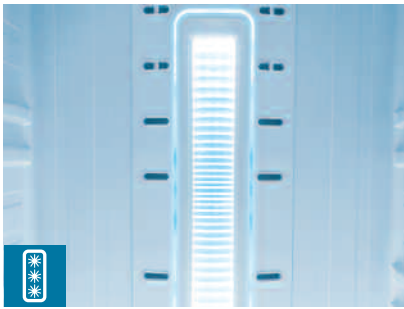

Big box fruit and salad drawers
Large storage space designed to accommodate all your favourite fruit and vegetables.

Power freeze/cool
Rapidly lowering the temperature of the fridge or freezer, this is perfect for when you have completed a big shopping trip or when you want to freeze fresh food so that it maintains its taste and nutrients.

Water and ice dispenser
Enjoy the convenience of having chilled and filtered water and ice on tap.

LED tower lighting
Space saving and energy efficient LED lighting will cast light into every corner of the fridge, enabling you to easily identify your food.

Stylish external LED display
The sophisticated LED panel provides a clear, easy to read display and gives you complete control at your fingertips.

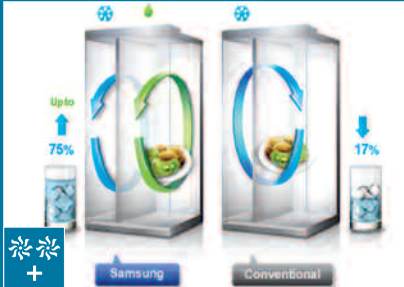

Holiday mode
Designed specifically to keep your entire fridge running efficiently while you're away from home. This intelligent feature turns off the fridge whilst keeping the freezer working.

Refrigeration

High performance cooling

Keep your food fresher and tastier for longer.

TWIN Cooling Plus™ system
Samsung's TWIN Cooling™ Plus system uses separate evaporators and fans to cool the fridge and freezer independently of each other, ensuring cold air from the freezer cannot travel into the fridge. This means the fridge retains a high humidity level of 75%, which is essential for preserving the freshness and flavour of your food. It also prevents any odour transfer between the two compartments.

Multi Flow cooling
Cooling air flows out through multiple outlets on every shelf, providing even cooling throughout the refrigerator, as well as quickly cooling the refrigerator back down to its optimal temperature after the door has been opened. By keeping the temperature steady, your food is kept safely chilled and better preserved.

Total no frost
Cold air circulates around the fridge and freezer, which picks up the moisture. This means there is no need to ever defrost the freezer, there is more space to store food with no icy build-ups and food stays in better condition and doesn't stick together.

The fridge within a fridge

CoolSelect Zone™/CoolSelect Pantry
An original Samsung feature, this specialised drawer allows you to select from different preset temperatures to meet your individual storage needs, all at the touch of a button.

G-Series

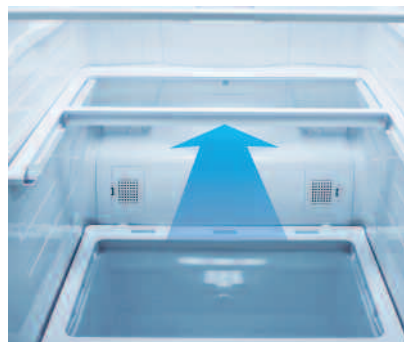

More space inside.
Same space outside

The G-Series utilises thin wall insulation which substantially increases inner storage space, whilst keeping the same dimensions on the outside. This maximises your storage space, meaning you can store more food, shop less often and organise your groceries more easily.

Moisture balanced fruit and vegetable drawers

Optimal humidity levels are maintained, to preserve vitamins and nutrients in fruits and vegetables.

Foldable shelf

This easy-to-use three-step folding shelf, makes storing over-sized items easy, providing greater flexibility to suit all shapes and sizes.

Can rack

The can rack, located in the fridge door, offers an excellent solution for storing cans.

More Space Inside,
Same Space Outside!

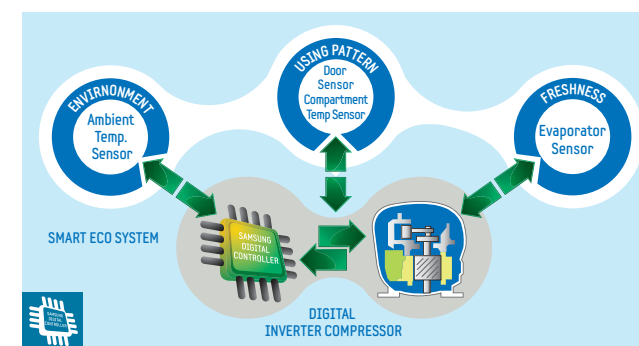

The G-Series Combi

Enjoy more space for the
food you love

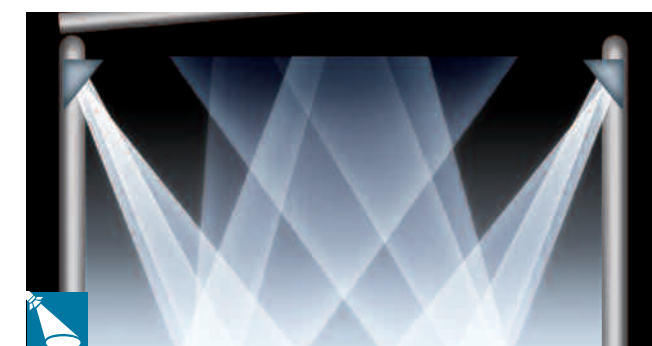

Benefiting from thin wall insulation technology, the G-Series fridge freezer range substantially increases inner storage space, whilst keeping the same dimensions on the outside. This maximises your storage space, meaning you can store more food, shop less often and organise your groceries more easily. With up to 400 litres storage space, you can store all your favourite food and drink.

Clever features

Digital inverter compressor

The compressor utilises multiple sensors that constantly monitor the temperature and humidity of the fridge freezer and adjusts its operation tailored to your usage behaviour. It also comes with a 10 year warranty for peace of mind.

Stage LED lighting

Placed at the front of the fridge, the two stage LED lighting will cast light into every corner of the fridge. LED lighting emits very little heat and is more durable and energy efficient than a standard bulb.

Stylish blue LED display

Full control at your fingertips. The fridge and freezer temperatures can be controlled via the stylish blue display, without ever having to open the doors.

Multi Flow cooling

Cooling air flows out through multiple outlets on every shelf, providing even cooling throughout the refrigerator, as well as quickly cooling the refrigerator back down to its optimal temperature after the door has been opened.

Fresh room zone

Low temperature drawer to keep meat and fish fresher for longer.

Power freeze

Rapidly lowering the temperature of the freezer, this is perfect for when you want to freeze fresh food so that it maintains its taste and nutrients.

Brita filtered water dispenser

Chilled and filtered water on tap without the need to plumb anything in.

Total no frost

Cold air circulates around the fridge and freezer, which picks up the moisture. This means there is no need to ever defrost the freezer and food stays in better condition and doesn't stick together.

Easy open door handles

Designed for your convenience, the easy open door handles are not only sturdy, but also open the doors with minimal force.

Holiday mode

Designed specifically to keep your entire fridge running efficiently while you're away from home. This intelligent feature turns off the fridge whilst keeping the freezer working.

Refrigeration

Direct cooling

There is no compromise on style with the Samsung direct cooling range. All products feature a stylish exterior, finished with bar handles. Inside, LED lighting will light up every corner of the fridge.

Tall TWIN One Door

Alone or together

Samsung's TWIN series can either be linked together to create a side-by-side look, or they can simply be used on their own.

TWIN features

Stylish blue LED display
The sophisticated LED panel provides a clear, easy to read display and gives you complete control at your fingertips.

Easy open pole bar handle
Designed for your convenience, the easy open door handles are not only sturdy, but also open the doors with minimal force.

Multi Flow cooling
Cooling air flows out through multiple outlets on every shelf, providing even cooling throughout, as well as quickly cooling the internal temperature after the door has been opened.

Fridge features

LED tower lighting
Space saving and energy efficient. LED lighting will cast light into every corner of the fridge, enabling you to easily identify your food.

Brita filtered water dispenser
Chilled and filtered water on tap without the need to plumb anything in.

Power cool
Rapidly lowering the temperature of the fridge, this is perfect for when you have completed a big shopping trip, so your food cools quickly and remains fresher for longer.

Foldable shelf
This easy-to-use three-step folding shelf makes storing over-sized items easy, providing greater flexibility to suit all shapes and sizes.

Humidity controlled fruit and vegetable drawer
Optimal humidity levels are maintained, to preserve vitamins and nutrients in fruits and vegetables.

Freezer features

LED lighting
Space saving and energy efficient LED lighting will cast light into every corner, enabling you to easily identify your food.

Twist icemaker
Fill with water, leave to freeze, then a simple twist will deposit your ice cubes into a handy tray.

Big box storage
Store and organise bulky items with ease and have enough space to store the Christmas turkey.

Power freeze
Enjoy the benefits of fast deep freezing and keep the nutrients and flavour of your food locked in.

No frost
Cold air circulates around the freezer, which picks up the moisture. This means there is no need to ever defrost the freezer and food stays in better condition and doesn't stick together.

Genuine quality guaranteed

Choose only genuine Samsung approved water filters for your Samsung refrigerator to ensure your water stays fresh and pure, day in, day out. Genuine water filters are available at www.4mysamsungappliance.co.uk.

By using a non-genuine water filter, you invalidate the warranty of your appliance, so always choose genuine Samsung accessories.

HAFEX

- Genuine water quality
- External installation
- Carbon block filter
- NSF Certified – chlorine colour and taste reduction
- Compatible with RSH5U & RSH7U models

HAFIN2

- Genuine water quality
- External installation
- Carbon block filter
- NSF Certified – heavy metals & chemical reduction
- Compatible with RFG23, RSG5 and RSH7Z models

Kitchen Solutions

Ovens

Discerning homes demand cooking options that cater for the varied eating habits of today's fast paced, yet leisure-centric lifestyles. This means radically reassessing what people expect in an oven. As a result, Samsung has created a range of stylish cooking appliances with the practical needs of modern living in mind – so the machines do the hard work, not you!

Samsung ovens combine ultra-stylish design with a range of highly innovative time-saving features unlike anything else available in the marketplace.

Dual Cook
Allows you to cook two different dishes at the same time, with different cooking temperatures and time settings.

Twin convection fans
Unlike traditional single fan ovens, Samsung's ovens feature twin convection fans that distribute heat around the oven far more effectively, ensuring more even and thorough cooking.

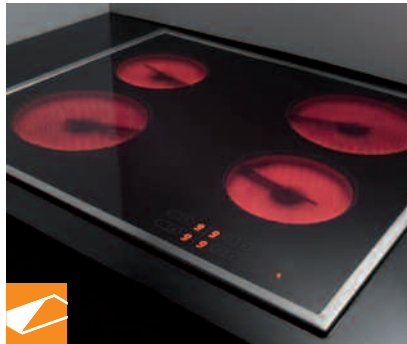

Self cleaning
Whether it's pyrolytic cleaning, catalytic cleaning or steam cleaning, all Samsung ovens are equipped with self-cleaning technology designed to make your life easier.

Hobs

The Samsung range of hobs offers something for everyone, with a choice of gas, ceramic and induction hobs each featuring a wide selection of innovative features.

Induction
Once you experience the magic of induction cooking, you'll never cook on a conventional hob again. Combining style with performance, induction offers the best of both worlds.

Ceramic
Say goodbye to undercooked or unevenly cooked dishes. Samsung's ceramic hob cooks all of your dishes thoroughly with a spacious and sleek cooking area.

Gas
Samsung's gas hobs provide stylish design and efficient features to help make cooking a true pleasure. Get fast, easy and precise cooking while preserving energy.

More Options

The finishing touches for any kitchen, why not add a Samsung speed oven for extra cooking flexibility and a hood to keep your kitchen fresh.

Speed oven
Our ovens are great at multi-tasking and fit into any kitchen decor. They're the ultimate convenience for quickly cooking up something deliciously unforgettable.

Hood
Our beautiful and functional hood will quickly and efficiently remove steam vapor and smoke. Keep your kitchen smelling fresh and clean with a Samsung hood.

"The brilliant thing about the Dual Cook is that it allows you to cook two things at the same time using different temperatures and settings."

Jamie

Dual Cook Oven

dual cook
two ovens in one

FRESH THINKING IN THE KITCHEN

To find out more about Jamie Oliver and the Samsung Dual Cook oven, visit www.samsung.com/uk/freshthinking

"One of the most brilliant things about the Dual Cook is that the oven can be divided into two smaller ovens. This gives you the ability to cook two things at the same time using different temperatures and settings. Imagine grilling beautiful pork chops in the top oven and baking a fruit crumble underneath. Total genius! You can save on electricity by cooking single dishes, like lasagne, in half of the oven, then simply remove the divider when you want to cook something bigger like a Christmas turkey. And with an amazing rapid heating system you don't have to wait ages for the oven to warm up – you can start cooking in a matter of seconds. It really opens up a world of possibilities".

Jamie

Entertaining your family and friends using a conventional single oven is difficult at the best of times. But try to cook several different dishes with different cooking times and temperatures and it's virtually impossible. That's why Samsung has developed the Dual Cook™ oven – with its sleek, sophisticated design and twin convection technology – giving you a double oven facility in the same size as a single oven, perfect for any kitchen.

It lets you cook different dishes, like desserts and main courses, at different temperatures, for different times, but only takes up the space of a standard single oven. And because there's no transfer of smell, even the most delicate of flavours can simmer away together.

The Dual Cook's™ innovative 'steam clean' facility also means that tidying up is just as easy – simply drop some water at the base of the oven, set the function and 25 minutes later you can wipe it completely clean. There is also an A energy rating in all cavities, so it's cost-effective and environmentally friendly too!

Twin oven

- Upper: Convection Heat
 - Lower: Convection Heat
- Suggested temperature:** 240°C/170°C the back wall heater is in operation, and in addition the fan is turned on.

Upper oven or grill

- Upper: Convection Heat
 - or grill
- Suggested temperature:** 170°C the back wall heater is in operation, and in addition the fan is turned on.

Lower oven

- Lower: Convection Heat
- Suggested temperature:** 170°C the back wall heater is in operation, and in addition the fan is turned on.

Single oven

- Convection Heat
- Suggested temperature:** 200°C for baking and roasting on one level. The back wall heaters are in operation.

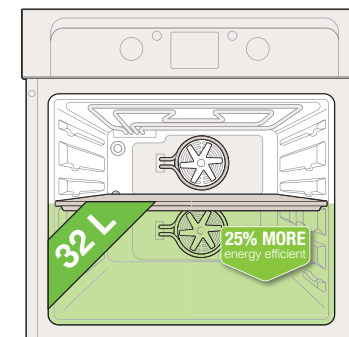

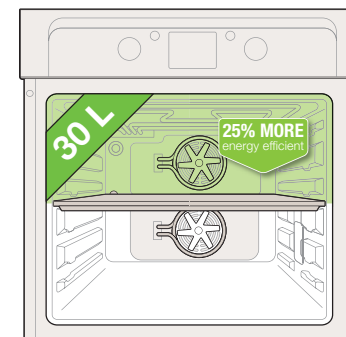

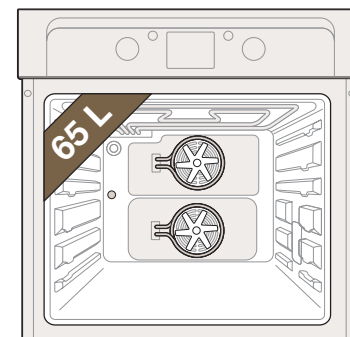

Dual Cook™ enables you to save energy

With an 'A' grade energy rating, the Dual Cook™ oven operates as efficiently and cost-effectively as possible. So when using half of the oven, with the shelf inserted, the Dual

Cook™ consumes 24% less energy than a conventional oven.

- Cook two dishes at once with different temperatures and time settings.

- Cook small dishes in either the upper or lower cavities without having to heat the entire oven.

Dual Cook Steam

Designed to provided a desire for a more flexible way to cook healthy and nutritious meals, the Dual Cook Steam Oven is the first of its kind to offer people the choice of splitting the oven cavity in half to simultaneously cook two separate dishes at two separate temperatures with the option of using steam technology.

The oven can be used either as a full 65L cavity with or without steam, or can be divided into two sections – a 32L lower section and a 30L upper section. The divider seals both cavities of the oven so that independent cooking programmes can be run without any transfer of odours or flavours between the two – even steaming in one half whilst roasting in the other. So people can literally cook any two dishes at the same time – for example steamed fish, alongside baked cupcakes.

A wide LED control panel and Dual Cook divider make the Dual Cook Steam very easy to use. For anyone unsure about what temperature to select for food preparation, cooking guidelines are printed on the inside of the glass oven door for a popular selection of the oven’s 65 automatic cooking menus (40 Easy Auto Menus and 25 Auto Steam Add Menus).

The fact the oven can either be used in its entirety or just one partition makes it exceptionally energy efficient. Rated AAA for energy efficiency, the Dual Cook Steam oven saves up to 25 percent energy when using only the upper cavity for smaller meals.

Dual Cook Steam oven

BQ1VD6T131

Why not pair this oven with a matching FQ115T001 See page 00

Unrivalled flexibility

- The Dual Cook Steam offers more cooking options and flexibility than ever before.
- Each half of the oven can be used and controlled independently, including the use of steam.
- Steam cooking can also be undertaken either in the provided glass steam tray (pure steaming of vegetables, fish, eggs etc), or directly in the oven cavity (steam assisted for cakes, meats etc).

Energy saving

For smaller meals it is often un-economical to heat the full cavity of an oven. Dual Cook technology allows you to heat only half of the oven if desired, saving 25% energy and resulting in even faster heat-up times.

Premium glass steam tray

The included premium glass steam tray can also be used as a glass roasting dish when not being used for steaming. It is dishwasher safe, and offers a spacious 12L capacity.

Speed Ovens

The perfect partner to a Samsung Dual Cook oven, a speed oven provides all the convenience of a microwave with all the flexibility of a second oven. You can cook using convection, grill or microwave options, or even combine microwaves with convection cooking to provide super-fast results.

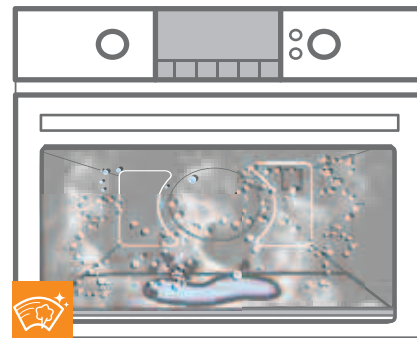

5-source multiple heating

You need an oven that is as versatile as you are! One that cooks different ways for different dishes. This convection oven features five heating systems. Two convection on the left and right, double grills and microwave in the back.

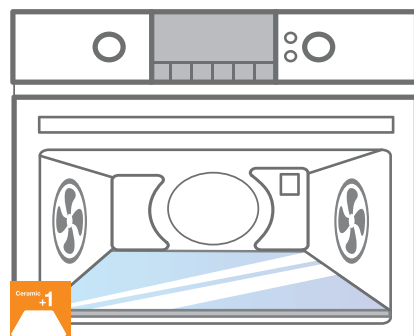

Speed cook

Busy households need quick solutions. You've got them with this convection oven. Five heating methods reduce your cooking time, giving you time for more important things.

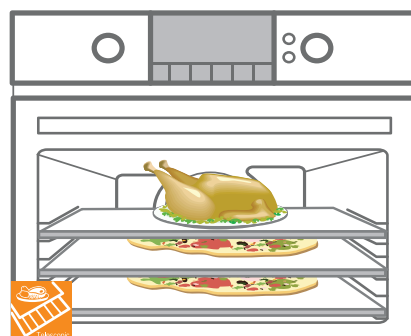

Steam clean

Hygienically clean your oven using Steam Clean. Steam Clean is a brilliant aid to cleaning, softening greasy residues. You can then simply wipe out the oven with a sponge or cloth.

Square ceramic tray

A combination oven for the perfect combination! The microwave function cooks evenly without a turntable. It's the stirrer fan that does the job, so you can cook larger portions anytime you want.

Multi Rack

Samsung broadens your cooking options with the Multi Rack. The removable, slide-out Multi Rack allows you to vary your cooking style based on your needs. With the Multi Rack, your cooking options are versatile!

Induction hobs

Induction hob technology produces heat from an electric current generated by an induction coil below the pot. All cookware (except glass, copper and aluminium) are heated on contact for a more convenient, safer and energy efficient way to cook your meals. Faster heating, more efficient cooking, and easier cleaning make induction hobs the perfect choice.

Easier to clean
No need to worry about spills and splatters after greasy cooking. Just wipe the surface clean with a soft cloth and it's done!

Ceramic surface
The sleek and sophisticated design gives your kitchen an exclusive look. Cooking with this much ease will make your dishes taste even better.

Safe operation
Neutral surface generates heat only upon contact with stainless steel or other compatible cookware. No sudden burns.

LED display
View information clearly on the wide display. It makes handling your hob simple and easy.

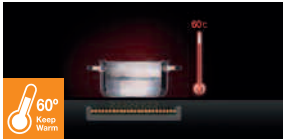

Smart touch control
Easily control all functions on simple external display panel, all at the touch of a finger.

Sliding & direct select control
Easily control all functions on the simple external display panel by sliding or selecting power level directly.

Auto water boiling
No need to worry about adding something to the boiling water. The Samsung Induction cooktop informs customers when it starts to boil. Just sit back and wait for the alarm.

Keep warm
Keep your dish a constant 60°C – a convenient way to keep food warm.

Ceramic hobs

Samsung electric ceramic hobs have a smooth glass finish, which provides a minimalist yet spacious cooking area that is practical and easy to clean, whilst the powerful heating elements ensure that the cooking rings heat up quickly and dishes are cooked thoroughly and evenly.

Ceramic glass cooking

Our ceramic glass cooking surface features four high tech cooking zones with powerful radiant heater surfaces to heat your food.

Easier to clean

Clean up is a snap with our smooth, ergonomic surfaces that can be easily wiped clean.

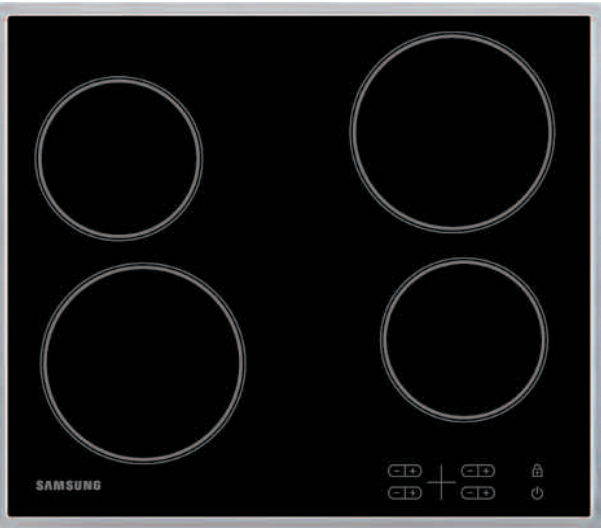

Automatic safety

Let Samsung ease your mind with our safety shut-off to ensure our appliances go off when you want them to. We also offer a child-safety lock to make sure little hands don't get themselves into trouble.

Control & function indicators

Never worry about a hot cooking surface again. After the heat is off, a 'H' shape afterheat indicator shows you whether it's safe to touch the surface or not.

Cooker hoods

Keeping your home fresh

Create a cleaner kitchen and fresher smelling home, free from the lingering smells and fumes normally associated with cooking. Samsung's cooker hoods will quickly, quietly and efficiently remove steam, vapour, smoke and odours. And, with a choice of three speeds, the emissions from even the most intensive cooking can be swiftly and effectively removed.

Suitable for ducted extraction or recirculation

The hood can be set up for either ducted extraction or recirculation.

Carbon air filters

The active carbon filters are used to purify the air which is released back into the room. The carbon traps bad odours from the aspirated air, making sure that your kitchen is left smelling fresh.

Aluminium grease filters

The dishwasher-safe aluminium grease filters protect the motor from fats contained in the air that is being extracted.

HC9347BG

Microwave Ovens

Multi sensor – Omnipro only
The auto cook function automatically prepares your food by detecting the amount of moisture and weight of the food to determine the perfect cooking time. This information is then constantly reassessed to ensure your food does not dry out or overcook. The OmniPro makes use of a multitude of intelligent sensors to make cooking a trouble free experience.

Ceramic enamel interior
The ceramic enamel interior is exceptionally smooth, making it easy to wipe off dirt and grime with a damp cloth. It also prevents discolouration and is highly scratch resistant, prolonging the life of the oven.

TRIO
TRIO is Samsung's innovative new microwave heating system. Rather than use just standard quartz or sheath heater, TRIO microwaves use both, in addition to a ceramic heater. The ceramic heater penetrates food more effectively than a standard heater, while the combination of all 3 heaters together heats up your food faster than ever.

Power steam bowl
Steam foods such as rice and vegetables in minutes using the power steam bowl.

Triple Distribution System
Conventional microwave ovens distribute microwaves from a single antenna, so the microwaves are concentrated on one part of the food, creating hot and cold spots. Samsung's Triple Distribution System overcomes this problem by using three antennae to distribute the waves more evenly.

Racks
Racks can be added to create another level in the microwave, increasing the amount of food you can heat in one go.

Steam clean
For a rapid and intense clean you can simply fill the steam clean container with water and place it in the microwave for 15 minutes. The steam will lift any grease and dirt, leaving the microwave ready to be wiped clean.

Deodorising function
Any odours inside the microwave can be instantly removed at the touch of a button.

Combination cooking
As well as the convenience of microwaving, Samsung's combination microwave ovens can also be used for convection cooking, by using a fan and heating element to create air flow patterns inside the microwave. In addition, the integrated grill is ideal for browning and crisping dishes.

Child safety lock
The controls on the microwave can be locked once it has been programmed to prevent children changing the settings.

Humidity sensor
All microwaves in Samsung's Sensor Technology range include a humidity sensor to monitor the moisture level of your food. Whether you're cooking vegetables or soup, the sensor makes cooking easier and ensures that your food is cooked to perfection every time.

Crisping plate
The crisping plate is perfect for cooking food such as pizza, and will ensure the food is always hot and crunchy.

OmniPro

Microwave ovens

If you want the functionality of a traditional oven but prefer the speed and convenience of a traditional microwave, then look no further than the Samsung OmniPro. This new total kitchen solution delivers cutting edge oven technology that is easy to use – so you can spend less time cooking, and more time enjoying the fruits of your labour.

CP1395ST

CP1395ST

36 litre combination microwave oven

36L

Multi sensor auto cook

Enjoy the ease and convenience of 35 auto cook options to take the 'guess work' out of cooking.

The auto cook function automatically prepares your food by detecting the amount of moisture and weight of the food to determine the perfect cooking mode and time. This information is then constantly reassessed to ensure your food does not dry out or overcook. The OmniPro makes use of a multitude of intelligent sensors to make cooking a trouble-free experience.

It works just like a conventional oven

Drop down door – The OmniPro's elegantly designed drop down door is as beautiful as it is functional. As well as being a striking design feature, the door is also strong enough to rest heavy dishes on, making cooking easier and more convenient.

36L capacity – The space saving design hides a huge internal capacity, meaning you can cook bulky food, such as a whole turkey with ease.

Accessories – The OmniPro comes with a variety of handy accessories; including a crisping plate, defrosting plate, square trays and grilling rack, meaning you can cook a variety of foods to perfection.

Ceramic Inside

All of Samsung's microwaves are equipped with a ceramic enamel interior. More usually found coating the interiors of premium built-in ovens, a ceramic enamel interior offers a wide range of benefits.

Scratch resistant

Ceramic enamel's hard wearing and durable qualities make it far more scratch and rust resistant than other microwave interiors.

Anti-Bacterial protection

The ceramic interior prevents growth of bacteria, ensuring a more hygienic environment for cooking.

Easy to clean

The ceramic interior is non-stick and allows grease and oil to be easily cleaned. Simply wipe with a damp cloth after use.

Vacuum cleaners

Advanced floor care

At the start or end of a busy day the last thing you need to do is battle with a host of cleaning products – you just need one tool that does the job that it's designed for. No fuss, no mess and no needless effort.

Samsung's range of vacuum cleaners contain models to suit everyone's needs – from large capacity upright designs to compact and powerful cylinders to automated floorcare solutions. Whatever your personal choice, you can be sure you'll get great looking design complemented with innovative technologies.

Twin Chamber™ system

The Twin Chamber™ System uses centrifugal force to separate the dust and debris from the air. Dust is separated efficiently, and then directed into a separate chamber, away from the flow of air and the pre-motor filter, reducing clogging and helping to give your vacuum cleaner even longer lasting suction power.

Easy to empty

Dust disposal is effortless. Simply press the catch, remove the dust bin and empty. And, unlike other systems, the dust bin cover will ensure that no dust can escape until you want it to.

HEPA filtration

HEPA filters capture and retain micro particles such as dirt and harmful allergens reducing the threat to allergy sufferers.

Petz Plus dual brush system

The FIDO upright incorporates an innovative dual brush system that picks up dust and pet hairs perfectly.

Lifetime washable filter

Samsung's filters are easy to check and wash so there's no need to buy replacements, as your vacuum cleaner will continue to deliver great results.

Low noise

With a much-needed low noise level you can now talk on the phone or watch television while you are vacuuming.

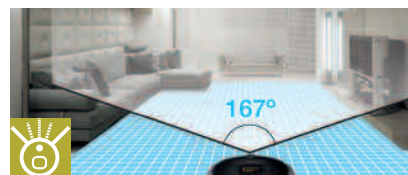

The NaviBot S intelligent robotic vacuum cleaner not only uses Samsung's advanced technology to clean your house automatically, swiftly and efficiently, it will even empty itself. All you have to do is sit back and relax.

One technological advance that differentiates the NaviBot S from previous robotic vacuum cleaners is the Visionary Mapping™ Plus system which can capture images at 15 frames per second with the onboard camera, creating a map of your house. NaviBot S also has the ability to memorise the best cleaning path, smartly calculating its exact location in your home using two CPU chips. Compared with competitor models, which clean in a haphazard and random manner, the NaviBot S reduces cleaning time whilst increasing coverage, for a more thorough cleaning performance.

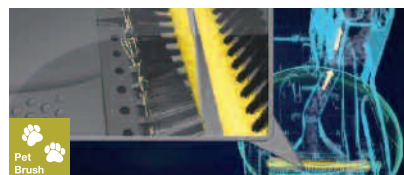

With the Auto Dust Emptying System, dust is automatically collected in the recharging base meaning less time needs to be spent emptying the device. When the NaviBot S is filled with dust, the vacuum returns to the recharging station. The recharging base automatically sucks dust from the vacuum's dust bin into a large 2L dustbin. When the emptying process is finished, the vacuum returns to its previous location and resumes vacuuming.

NaviBot S – the smarter way to clean

Visionary Mapping™ Plus

NaviBot S uses a digital camera to capture images of the ceiling and map your house at 15 frames/sec.

Pet Hair Care

NaviBot S features a wider brush and is designed to efficiently pick up pet hair from hard floor or carpet.

Slim & sleek design

At only 80 mm high, NaviBot S can clean even under low furniture.

Auto Dust Emptying

When full, NaviBot S returns to the recharging base where dust and dirt is deposited into the dust bin. On resume, NaviBot S remembers where it last cleaned and resumes from there.

2L dust bin

The recharging base has a large 2L capacity dust bin which can be easily unclipped and emptied into the dust bin when full.

Virtual Guard™

Virtual Guard™ creates an invisible fence to prevent the NaviBot S from entering a specific area. The Virtual Guide mode tells NaviBot S to complete one room before moving to the next.

Vivid Colour Range

The new Vivid range of bagless upright and cylinder vacuum cleaners is stylishly designed to add a burst of colour to your life. Samsung's innovative Twin Chamber™ System divides the normal dust chamber into two compartments, allowing for improved cleaning and longer lasting power. Furthermore, the range includes fully washable HEPA filters to ensure from dust particles and harmful allergens. Now more compact than ever, Vivid cylinders are lightweight, but more than powerful enough to keep your home dirt and dust free. The upright range boasts an impressive 3.5 litre capacity whilst still being astonishingly lightweight and manoeuvrable. With additional features, such as auto cord rewind, brushes to maximise pick-up, an easy-to-empty dustbin and cleaning accessories to add flexibility to your daily routine, the Vivid range provides the perfect all round floorcare solution.

The Fido Upright

At Samsung we understand that while cats and dogs are man's best friend, they also leave behind hairs that most vacuum cleaners struggle to deal with. The FIDO has been specifically designed to pick up hairs, dust and dirt effectively, leaving you with more time to relax.

The FIDO combines stylish design with innovative features that specialise in pet hair removal. The unique Dual Brush System™ improves hair and dust pickup, leaving you with a cleaner and more hygienic home.

FlexSlim

Vacuum cleaners

Twin Chamber™ system

The FlexSlim has enhanced dust collection due to the unique cyclonic air flow. Strong centrifugal force is generated which separates dust from the air.

High power, longer operation

The FlexSlim can operate for twice as long as conventional hand sticks before having to be recharged.

2-in-1 handheld

The main chamber can be unclipped easily from the body, turning the machine into a handheld. Perfect for the car or for smaller spillages.

Efficient edge cleaning

An adjustable rubber edge cleaner opens when the vacuum is pushed and closes when pulled back, as a result reaching difficult areas.

Self standing

FlexSlim can stand alone meaning you can leave the vacuum, perform other tasks, and then come straight back and carry on where you left off.

Swivel brush

Swivel brush gives you increased manoeuvrability while you vacuum. Resultantly you can clean difficult areas, such as under the table.

SS7550/5

- Twin Chamber™ system
- 0.5L dust capacity
- 2-in-1 stick & handheld vacuum
- HEPA exhaust filter
- 170 degrees swivel brush
